1. Executive Notes for January

OntarioMD appreciates your comments on this report and we welcome your ongoing feedback so that we can continue to deliver value in reporting relevant content.

Privacy and Security Training

OntarioMD launched online Privacy and Security Training Module last month and interest among physician practices and stakeholders is increasing as they view the module as a comprehensive and convenient way to consume training on privacy legislation, and how to fulfill their obligations to protect Personal Health Information (PHI) on an ongoing basis. OntarioMD is now in discussions with health care organizations that are considering how the training would support a broader clinician base. We welcome your interest in how the tool may serve your needs.

Service Desk Support for HRM

OntarioMD smoothly transitioned support for HRM to the OntarioMD Service Desk from the eHealth Ontario Service Desk on January 29, 2018. Users now have one main contact to open a ticket and track the status of their ticket. They are also experiencing quicker response and resolution times.

Supporting Our Partners

OntarioMD has entered into an Agreement (TPA) with eHealth Ontario to support Toronto Central (TC) LHIN and eHealth Ontario to deliver the Provider Secure Communication Package (which includes ONE[®] Mail, ONE ID and ConnectingOntario Viewer) to primary care physicians in the TC LHIN area and to the four Northern and Eastern Region (NER) LHINs, specifically, the South East, Champlain, North East and North West LHINs. The ConnectingOntario Viewer is eagerly anticipated in some of the more remote areas of Ontario, and OntarioMD is already fielding requests from physicians interested in participating. TC LHIN onboarding has already begun, and kick-off /planning meetings with each of the four NER LHINs have begun and will continue into February 2018.

OntarioMD and Ontario Telemedicine Network

Work on the next phase of Provincial eConsult Program and the new Enhanced Access to Primary Care (EAPC) series of pilots is underway following the new agreement between OntarioMD and the Ontario Telemedicine Network (OTN). OntarioMD is providing physicians with access to digital health services using a partnered approach that bundles multiple digital health offerings into a single engagement, which is more efficient and convenient for physician practices.

In addition to delivering access to OTN's eConsult, OntarioMD is delivering comprehensive change management and adoption support, EMR integration, privacy and security training, reporting and analytics on behalf of the Provincial eConsult Program.

OntarioMD is also supporting the Enhanced Access to Primary Care (EAPC) series of pilots aimed at enhancing patient access to primary care. This service is offered by OTN, in partnership with Ontario's

Local Health Integration Networks (LHINs). The service allows patients to initiate a request for a virtual visit, or eVisit, with a primary care provider through a user-friendly online platform. OntarioMD is delivering change management and adoption support, and an assessment to investigate opportunities for EMR integration with the platform. OntarioMD's Health Report Manager (HRM) will be leveraged to ensure that documentation related to eVisits will be shared with patients' primary care providers through their EMRs to ensure they are aware of these virtual visits.

OntarioMD Events

Our 'On the Road with OntarioMD' regional educational seminars resumed in 2018. The first one of the year took place on January 17 in Kingston followed by the seminar in Kitchener-Waterloo on January 31. Spaces are limited to 40 to 50 physicians and their staff and each seminar has had a capacity audience. The seminars offer one hour of didactic learning, which is currently focused on Partnered Efforts in Safe Opioid Prescribing. The presentation is then followed by small group learning with Peer Leaders who use the same EMRs as the attendees. Attendee feedback has been excellent and physicians and their staff value the Peer Leader presentation and the time they get to spend with the Peer Leader at the table discussions. The sessions are CME-accredited by the College of Family Physicians of Canada's Ontario Chapter for two hours of Mainpro+ credits.

During 'On the Road' events, attendees can request enrolment in OntarioMD products and services as well as ONE® ID. The next seminars will be in Toronto on February 7 and in Ancaster on March 7.

Early bird registration for the April 12 EMR: Every Step Conference in London is open until March 1. The conference attracts approximately 200 physicians and their staff and a full house of exhibitors. Stakeholders are welcome to view the agenda and register to attend at <https://www.ontariomd.ca/about-us/events/emr-every-step-conference-london-2018>.

Registration is also open for the EMR: Every Step Conference in Toronto on September 27 at <https://www.ontariomd.ca/pages/emr-every-step-conference---toronto-2018.aspx>. The Toronto conference has attracted close to 1,000 attendees over the years. The Call for Abstracts for the Toronto conference will be announced later this year. We invite all stakeholders to attend our EMR: Every Step Conferences

OntarioMD would also be pleased to speak at, or exhibit at, events hosted by the LHINs and other stakeholders.

2. Introduction

The purpose of this report is to provide OntarioMD's partners and stakeholders with a monthly update on the provincial view of community-based family physicians' and community specialists' adoption and optimized use of certified EMRs and other digital health services integrated with certified EMRs. Except where indicated, this report does not include information about adoption of the referenced digital health applications by nurse practitioners or other health care service providers.

By helping physicians become more proficient EMR users, OntarioMD helps realize the clinical value and full potential of EMRs to enhance patient care and enable even more widespread health system benefits. EMRs are an important foundation for realizing the provincial vision for a comprehensive electronic health record (EHR) for all Ontarians.

3. OntarioMD and Local Health Integration Networks

OntarioMD is focused on the delivery of digital health products and services that translate into clinical value for physicians and their patients. OntarioMD works closely, and in partnership, with other health care organizations across the province, including the 14 Local Health Integration Networks (LHINs).

Our regional Practice Advisors take an integrated approach to working with physician practices, bundling products and change management services on behalf of the LHINs for efficient visits to practices. This reduces multiple touchpoints to the physician office and streamlines training and on-boarding so the physicians can spend less time on administration and more time on patient care.

What We Do

- Connect physician practices in Ontario to provincial applications that inform clinical decisions, such as OntarioMD's Health Report Manager (HRM), eNotifications, the EMR Physician Dashboard, eConsult and the Ontario Laboratories Information System (OLIS). We are also starting to deploy the ConnectingOntario Viewer, as well as ONE® Mail and ONE ID services, on behalf of eHealth Ontario and many LHINs.
- Provide physicians with advice, guidance and EMR practice enhancement support to optimize their EMR use through experienced Practice Advisors located across Ontario, the EMR Practice Enhancement Program (EPEP) and the Peer Leader Program.
- Deliver a trusted EMR certification and vendor management program that assesses, monitors and manages EMR vendors and their products for compliance with the Ontario EMR Specifications providing assurance to physicians that their EMRs meet their needs.

4. OntarioMD Products and Services

OntarioMD products and services are provincial digital health assets aligned to the Patients First: Digital Health Strategy in support of the health system transformation described in Ontario's *Patients First: Action Plan for Health Care*. Enabling the flow of patient information directly to OntarioMD-certified EMRs supports the Digital Health Strategy:

- Enhance access to health information and services
- Strengthen quality, effectiveness and accountability
- Stimulate innovation and growth

OntarioMD receives funding from the Ministry of Health and Long-Term Care (MOHLTC), with a mandate to support connectivity, interoperability, and integration of EMRs with the digital health delivery system more broadly and to work with clinicians to optimize the clinical value of their certified EMRs and care they provide to patients.

CLIENT SERVICES AND ENGAGEMENT

OntarioMD Practice Advisors work closely with physician practices to address their needs and enable them to enhance clinical value through technology. They assist practices to successfully navigate enrolment, onboarding and deployment processes, including completing subscription agreements for products such as Health Report Manager (HRM). They work with EMR vendors when necessary to facilitate connectivity, educate on functionality and to advocate when issues arise; all to ensure optimized use of the EMR.

With partner LHINs, Practice Advisors work to ensure the efficient delivery of products and services that meet regional needs and provincial priorities.

Practice Advisors work locally in all LHINs and provide change management services to integrate physician practices with new digital health solutions that provide immediate clinical value. They support physicians and their staff through the EMR Practice Enhancement Program (EPEP) to develop step-by-step advice and plans, tools and techniques based on the specific needs of patients and the practice. Their knowledge and expertise lead to improvements in practice efficiency and a better experience for patients and practice staff.

Some of the top examples of how Practice Advisors have helped practices include change management strategies for improving:

- Data standardization, quality and integrity
- Preventive care

- Internal workflow processes to enhance the patient experience
- Communications, etc.

In addition to the many improvements Practice Advisors can facilitate, they have also shared their experience in using EMRs to:

- Manage chronic diseases
- Eliminate appointment backlogs
- Manage documents
- Conduct effective queries, and much more.

EMR PRACTICE ENHANCEMENT PROGRAM

The EMR Practice Enhancement Program (EPEP) is a provincial change management service designed to help physicians enhance their EMR skills and efficiency, to improve clinical and practice outcomes. No matter the current level of EMR skill, EPEP offers a current state analysis of EMR use, practice workflow and data quality to help physicians move beyond data capture and use information to improve patient care and practice efficiency to a desired level of EMR maturity.

EPEP is based on OntarioMD's [EMR Maturity Model](#), an evidence-based framework for measuring, understanding and enhancing EMR use. The program provides hands-on support from Practice Advisors, who are expert EMR users, to create an enhancement plan, enriched with quality improvement methodology, that reflects unique practice priorities, leading to improved workflow, efficiency and patient care.

To get started with EPEP, physicians are encouraged to complete an [EMR Progress Assessment \(EPA\)](#), which is designed to help physicians identify their current EMR skill level and areas in which they would like to improve. Email epep@ontariomd.com for more information or to request a consultation.

PEER LEADER PROGRAM

OntarioMD's Peer Leader Program is a regional network of physicians, nurses and clinic managers across the province who are expert users of OntarioMD-certified EMRs. They support physician practices to realize increasing clinical value from their EMRs. The Peer Leader Program has been primarily funded by Canada Health Infoway.

Peer Leaders provide consulting services to physician practices that can lead to more efficient EMR use and workflow, optimization of existing EMR functions and access to additional ones, improved clinical decision support, and much more. They also provide guidance to OntarioMD on physician practice perspectives and priorities with regards to the development of innovation and enhancements to current OntarioMD programs. Peer Leaders are highly skilled thinkers in advanced EMR use, moving health system policy to practice, and quality improvement.

Contact peer.leader.program@ontariomd.com to request a Peer Leader. Peer Leaders are also available at OntarioMD's EMR: Every Step Conferences, our On the Road with OntarioMD educational seminars, and other regional events to meet one-on-one with attendees.

Health Report Manager (HRM) is an award-winning digital health solution developed by OntarioMD. It improves communication among health care providers by enabling physicians and practices using an OntarioMD-certified electronic medical record (EMR) to securely receive patient reports electronically from hospitals and other health care facilities directly into their EMRs. By eliminating paper reports, HRM makes report delivery safer and more secure while saving time and money for both hospitals and specialty facilities that send reports as well as the physician practices that receive them.

Thousands of physicians in the 14 LHINs across Ontario are now receiving reports, eNotifications and Ontario Telemedicine Network telehomecare reports, benefitting from the security, scalability, ease, and speed of HRM report delivery to follow up with their patients and continue appropriate treatment. In LHINs 13 and 14, clinicians are transitioning from the Physician Office Integration (POI) Project to HRM so their clinicians can receive hospital and specialty clinic reports not only from their own LHINs, but from hospitals and specialty clinics across Ontario where their patients have received care. OntarioMD Practice Advisors have worked with thousands of physicians to incorporate HRM into their workflow to better inform clinical decisions that result in better patient outcomes and more efficient practices.

OntarioMD is leading the expansion and continuous enhancement of HRM across the province in collaboration with the LHINs and other delivery partners. To sign up for HRM, email report.manager@ontariomd.com.

eNOTIFICATIONS

eNotifications are sent through HRM to alert physicians and their practices in real time when a patient has been discharged from an emergency department, or admitted or discharged from an in-patient unit. eNotifications help improve communications and care coordination between hospitals and family physicians, especially with respect to hospital visits of complex care patients. eNotifications also support Health Links by enabling faster and safer follow-up treatment, and potentially reducing hospital readmissions. Physicians already connected to HRM will automatically receive eNotifications. Once they do, OntarioMD Practice Advisors can assist clinicians to understand how eNotifications fit into their workflows. eNotifications have been recognized by Accreditation Canada as a Leading Practice for communication and patient safety.

OntarioMD is leading the expansion of eNotifications to primary care across the province and works collaboratively with Health Shared Services Ontario, and LHINs towards enabling hospitals to send eNotifications. For more information on using eNotifications, email enotifications@ontariomd.com.

EMR CERTIFICATION PROGRAM

OntarioMD is Ontario's EMR certification body and manages the EMR Certification Program. The EMR Certification Program is the only current mechanism in Ontario through which to translate Ministry priorities, manage EMR vendors and drive EMR use by physicians. Certified EMRs are a mandatory requirement for physician practices to access provincial digital health applications such as HRM, eNotifications and OLIS. Over 14,000 physicians use OntarioMD-certified EMR products. The EMR Certification Program continuously evolves certified EMRs, taking into account physicians' needs and the future of digital health in Ontario and the rest of Canada. It also helps physician practices leverage new EMR functionality that leads to their optimized use of a certified EMR.

OntarioMD has moved to open certification, which allows new vendors to apply for certification at any time and enables OntarioMD to respond more quickly to evolving system needs. For more information, email emr@ontariomd.com.

OLIS DEPLOYMENT

OntarioMD is leading the deployment of OLIS to physician practices on behalf of eHealth Ontario. OLIS is a system that connects hospitals, community laboratories, public health laboratories and practitioners to facilitate the secure electronic exchange of laboratory test orders and results.

Clinicians using an OntarioMD-certified EMR can access the latest lab results for their patients or perform patient queries. To sign up for OLIS, email support@ontariomd.com.

OntarioMD is working with Canada Health Infoway and eHealth Ontario on OLIS Practitioner Query (OLIS PQ). OLIS PQ provides an integrated laboratory feed (over 90% of all lab results in Ontario) to an EMR.

PRIVACY TRAINING AND RESOURCES

OntarioMD provides privacy, security and legal expertise to physician practices to educate them about their role and responsibilities as Health Information Custodians under the *Personal Health Information Protection Act* (PHIPA). Privacy and security tools and resources are available to all physicians and are regularly updated to address emerging technology or new cyberthreats. OntarioMD offers a comprehensive online Privacy and Security Training Module to support community-based physicians access provincial digital health assets. The Module covers topics such as safeguarding PHI and other confidential data from breaches, and how to comply with obligations under Ontario's *Personal Health Information Protection Act* (PHIPA).

The OntarioMD Privacy and Security Training Module was developed with input from the College of Physicians and Surgeons (CPSO), the Canadian Medical Protective Association (CMPA), the Ontario Medical Association (OMA) and eHealth Ontario. The module has been certified as a Self-Learning Program by the College of Family Physicians of Canada for up to two Mainpro+ credits.

The OntarioMD Privacy and Security Training Module is available at OntarioMD.ca, and can be accessed from any device that connects to the Internet. Physicians and their staff must be registered users of OntarioMD.ca to access the training and can log in with their email and password.

EMR: EVERY STEP CONFERENCE

The EMR: Every Step Conference is OntarioMD's flagship conference and Canada's largest EMR conference series. The conference is focused on educating physician practices on realizing the full benefits of a certified EMR. Since 2012, nearly 5,000 attendees have participated in the conference series.

Two conferences are held each year in locations across Ontario. More than 700 clinicians and digital health care stakeholders from across the province attended our September 2017 conference in Toronto. Attendees picked up valuable EMR optimization tips and advice at more than 25 educational

sessions offered across four streams of learning, and were eligible to earn up to 7.5 Mainpro+ credits. Registration is now open for our 2018 EMR: Every Step conferences in London on April 12 and in Toronto on September 27, 2018. To learn more, [visit ontariomd.ca](http://visit.ontariomd.ca) or contact omd.events@ontariomd.com.

5. Proof of Concepts 2017-18

eConsult gives family physicians, nurse practitioners and specialists the ability to engage in a secure electronic dialogue, improving patient care by reducing unnecessary referrals to specialists for in-person diagnosis and treatment.

OntarioMD has partnered with the Ontario Telemedicine Network (OTN) and the Champlain BASE eConsult service to develop a provincial eConsult strategy which unifies their platforms, creating a single service for all clinicians in the province.

The Provincial eConsult Initiative has brought on over 6,000 new eConsult users from January 2015 to date. With an average patient roster size of 840, these users now have the opportunity to request eConsults for approximately 5 million patients. The initiative was also able to double the number of specialists using eConsult, opening up access to specialists for patients and their family doctors anywhere in the province – a family doctor from Thunder Bay can request an eConsult from a specialist in Thunder Bay or Windsor, or anywhere in between.

The initiative is currently in pilot phase and continues to recruit family physicians in all LHINs. To sign up for eConsult, email econsult@ontariomd.com.

Registered Clinicians on Provincial eConsult by LHIN

OntarioMD will continue to support deployment of eConsult provincially. OntarioMD successfully completed the eConsult EMR Integration proof of concept (PoC) in collaboration with eHealth Ontario and OTN. The eConsult EMR Integration will complement physician workflow when using eConsult and will promote increased adoption by EMR users. The goal is to facilitate increased integration between EMRs and provincial digital health assets.

QHR Technologies and OSCAR EMR were selected through a competitive procurement to participate in the PoC. Approximately 40 physicians (referrers and specialists) are participating and have gone live on the Accuro and OSCAR EMRs. The learnings from the PoC are being compiled and OntarioMD will aim to produce a draft specification and publish the Specification for eConsult EMR Integration by next spring.

OntarioMD is leading an initiative that will demonstrate continuous improvement in the clinical value of EMRs through the EMR Physician Dashboard. The EMR Physician Dashboard is a priority for all LHINs. The EMR Physician Dashboard provides a framework for real-time access to an introductory set of high-value provincial indicators from Health Quality Ontario (HQO), the Canadian Institute for Health Information (CIHI) and the Association of Family Health Teams of Ontario (AFHTO), along with

indicators to improve management of physician practices such as the percentage of eligible patients within a roster who've been screened for colorectal cancer. Physicians will see these population health indicators at a glance and can develop action plans.

OntarioMD worked with TELUS Health and OSCAR EMR and over 100 physicians on Phase 1 of the EMR Physician Dashboard proof of concept. The [Phase 1 Benefits Evaluation, Final Report](#), a [summary of key findings and next steps](#), and [frequently asked questions](#) have been published on OntarioMD.ca.

Phase 2 of the initiative launched in October 2017, and will run to July 2018. It will expand the number of indicators in the dashboard and will increase participation by up to 400 additional physicians to further demonstrate the framework's value. During Phase 2, we will:

- further identify and refine dashboard indicators,
- deploy to more physicians across all LHINs, and
- define a business plan for a provincial EMR Physician Dashboard solution.

For more information on OntarioMD's EMR Physician Dashboard initiative, email EMRdashboard@ontariomd.com.
