1. Executive Notes for August

Health Report Manager

This month's report includes a list of all hospitals by LHIN, providing an overview of the status of hospitals that are connected to Health Report Manager (HRM) and eNotifications.

EMR Integration

This month's report includes a new table that provides a status summary of which EMR vendors are currently working with OntarioMD to integrate their certified EMR offerings with provincial digital health services.

2018-19 Annual Report

[OntarioMD's 2018-19 Annual Report](#) highlights our activity throughout the past fiscal year in delivering value to the health care system. It provides a clear snapshot of our work with clinicians, teams, and partners and how this can be leveraged in the coming year to drive integrated care and system-wide quality improvement.

Insights4Care Program

OntarioMD's Insights4Care (i4C) program combines EMR-integrated data quality tools like the i4C Dashboard (formerly the EMR Quality Dashboard) with valuable support from OntarioMD staff through the i4C Advisory Service. The i4C Dashboard is expanding to serve an additional 500 clinicians and additional certified EMR offerings over the next year. In addition to adding new clinician users, the i4C Dashboard will also deliver population comparative insights to clinicians, Ontario Health Teams and other stakeholders. With use of the i4C Dashboard's trend and compare feature, clinicians and the broader health care system will increasingly see a view of community-based population health across the province. Another future phase of the program will build on this work by enabling clinicians to share additional EMR data for secondary use including research and health system planning.

The i4C Advisory Service helps clinicians unlock the value of their EMR data for clinical insights and quality improvement. The service is open to all physician practices regardless of whether they use the i4C Dashboard.

Supporting Our Partners

OntarioMD supports clinicians with innovative digital health and quality improvement tools and approaches required to address their practice needs and to enhance the provision of integrated care in Ontario Health Teams as they take shape across the province. OntarioMD supports system partners such as the Ministry of Health (MOH), the organizations that comprise Ontario Health and the Ontario Telemedicine Network (OTN), using a streamlined onboarding approach that bundles multiple digital health offerings in Ontario's digital health asset inventory into a single visit. This bundled approach is appreciated by clinicians for being more efficient and convenient.

Ministry of Health

OntarioMD is working with the MOH and eHealth Ontario to connect up to 250 community-based physicians and nurse practitioners who use OntarioMD-certified EMRs by 2020 to the **Digital Health Drug Repository (DHDR)** and **Digital Health Immunization Repository (DHIR)** from their EMRs.

Ontario Telemedicine Network's eVisits - OntarioMD continues to support existing users while the province explores expansion options and Benefits Evaluation results.

eConsult-EMR Integration

The [summary report](#) for the eConsult-EMR Benefits Evaluation has been published highlighting the key findings during the pilot phase. OntarioMD is now expanding this work to all certified EMR vendors for development and provincial roll-out. The [EMR eConsult Specification](#) to guide vendors with certified EMR offerings to enable clinicians to connect to eConsult directly from their EMRs is available. OntarioMD will connect 800 additional clinicians by the end of March 2020.

2. Introduction

The purpose of this report is to provide a monthly update on the provincial view of community-based family physicians' and community specialists' adoption and optimized use of certified EMRs and digital health tools and services integrated with certified EMRs. Except where indicated, this report does not include information about adoption of the referenced digital health applications by nurse practitioners or other health care service providers.

By helping physicians become increasingly proficient EMR users, OntarioMD assists physician practices in realizing more clinical value and the full potential of digital health tools and services to enhance patient care. These tools and services are also improving Ontarians' access to care and improving clinical outcomes in an increasingly integrated and coordinated health care system.

3. OntarioMD, Ontario Health and Ontario Health Teams

OntarioMD is focused on the delivery of digital health products and services that translate into clinical value for physicians and their patients. OntarioMD has the infrastructure, relationships and experience to deliver cost-effectively the full spectrum of high-quality digital health programs and services for clinicians and Ontario Health Teams across the province in alignment with Ontario's Digital First Strategy. It works closely, and in partnership, with health care organizations across Ontario.

OntarioMD staff take a holistic approach to working with physician practices, bundling products and change management services on behalf of our stakeholders for efficient visits to practices regionally and locally. This reduces multiple touchpoints to the physician office and streamlines training and onboarding, so physicians can spend less time on administration and more time on patient care.

What We Do

- Connect clinician practices to OntarioMD's digital health tools that improve access to care, clinical outcomes and decision-making, such as Health Report Manager (HRM) and the i4C Dashboard.
- Connect clinician practices to eConsult on behalf of the Ontario eConsult Program, eVisits (Enhanced Access to Primary Care) on behalf of OTN, eNotifications in collaboration with HSSO, the DHDR and DHIR (when ready for deployment) on behalf of the Ministry, and deploying the Ontario Laboratories Information System (OLIS), ConnectingOntario ClinicalViewer, ONE®ID and ONE Mail on behalf of eHealth Ontario.
- Provide physicians with trusted advice, guidance and onboarding support from OntarioMD staff, located across Ontario, to optimize EMR and digital health use
- Provide in-depth, hands-on support for physicians' quality improvement and population health management goals through our i4C Advisory Service's experienced staff
- Mentor physician practices with practical EMR tips from physician, nurse and clinic manager Peer Leaders who understand how physicians practice and share their expertise with the same EMR
- Manage EMR vendors and deliver a trusted EMR certification program that assesses and monitors EMR offerings for compliance with the Ontario EMR Specifications. OntarioMD certification provides assurance to physicians that their EMRs are providing clinical value and are facilitating the exchange of EMR data. Vendors know that OntarioMD understands clinicians and how to bring digital health tools into their practices.

4. OntarioMD Products and Services

OntarioMD products and services are provincial digital health assets for clinicians and centred around patients. Enabling the flow of patient information directly to OntarioMD-certified EMRs supports:

- Access to care, services and health information
- Enhances the efficiency of the health system
- Strengthens quality, effectiveness and accountability
- Stimulates innovation and growth

OntarioMD receives funding from the Ministry of Health (MOH), with a mandate to support connectivity, interoperability, and integration of EMRs with the digital health delivery system more broadly and to work with clinicians to optimize the clinical value of their certified EMRs to provide enhanced care to their patients.

For an overview of all OntarioMD products and services, please read our [Products & Services brochure](#).

5. Quarterly Growth by Product/Service

Product/Category	Total Physicians (August 31, 2019)	Total Physicians (June 30, 2019)	Quarterly Growth

1.14 Appendix N: LHIN 14 – North West

LHIN 14 - Provincial Product/Service % Penetration		
Product	LHIN 14 Penetration ¹	Change
eNotifications (Hospitals)*	100%	
HRM (Physicians)	4%	
HRM (Hospitals)	100%	
OLIS (Physicians)*	43%	

*OntarioMD has re-counted eligible hospital sites for HRM and eNotifications to align with the Ministry of Health Eligible Hospital Sites. Details of additional sites and their effect on penetration rates were provided in the April 2018 LHIN Report. There is no change in denominator for HRM and eNotifications sites for LHIN 14 in May 2018.
