1. Introduction

The purpose of this report is to provide a monthly update on the adoption and uptake of provincial digital health services by community-based family physicians' and specialists' use of OntarioMD certified EMRs and other digital health tools and web-based applications. Except where indicated, this report does not include information about adoption of the referenced digital health applications by nurse practitioners or other health care service providers.

By helping physicians adopt new technologies and tools and become increasingly proficient EMR users, OntarioMD assists physician practices in realizing more clinical value and the full potential of digital health tools and services to enhance patient care. These tools and services are also improving Ontarians' access to care and improving clinical outcomes in an increasingly integrated and coordinated health care system.

2. Executive Notes for November

In this month's report, Table 9: i4C (formerly EMR Quality) Dashboard Physician Participation by LHIN, the Reach Out/Onboarded/Deployed/Training Complete categories have been removed and only physicians who have gone live with the Dashboard are being reported.

2019 Physician Survey

OntarioMD sent its annual survey to more than 15,000 physicians, including physicians who are not in our core programs. The response rate this year was 4.5%. Survey recipients were asked to rate their familiarity and satisfaction with OntarioMD and its products and services. Responses indicated higher familiarity and satisfaction than a year ago:

- **55%** are somewhat/very satisfied (up from 51.7% in 2018)
- **7.5%** are very/somewhat dissatisfied (down from 15.8% in 2018)
- Respondents overwhelmingly identified helping them connect to data sources (HRM, OLIS) as the most important role OntarioMD holds (**89.9%** very/somewhat important)
- **38.7%** often identified compatibility with other digital health tools as a "high" impact challenge
- Nearly half of respondents also provided comments; two themes emerged:
 - **Support** – The experience and capacity of OntarioMD to address gaps in available on-site support, education and training
 - **Integration** –The importance of connecting to centralized data sources with an overwhelming preference for digital health tools that are integrated with their EMRs

OntarioMD.ca User Experience

OntarioMD has made enhancements for registered users of the portal. Users can now access their eAgreements on their customized home page and have direct access to other services such as the Privacy & Security Training Module.

ConnectingOntario ClinicalViewer

OntarioMD has now connected over 1,000 community-based, primary care clinicians provincially.

3. OntarioMD Products and Services

OntarioMD products and services are provincial digital health assets for clinicians centred around patients. Enabling the flow of patient information directly to OntarioMD-certified EMRs:

- Supports access to care, services and health information
- Enhances the efficiency of the health system
- Strengthens quality, effectiveness and accountability
- Stimulates innovation and growth

OntarioMD receives funding from the Ministry of Health (MOH), with a mandate to support connectivity, interoperability, and integration of EMRs with the digital health delivery system more broadly and to work with clinicians to optimize the clinical value of their certified EMRs to provide enhanced care to their patients.

For an overview of all OntarioMD products and services, please read our [Products & Services brochure](#).

4. Quarterly Growth by Product/Service

Product/Category	Total Physicians (November 30, 2019)	Total Physicians (September 30, 2019)	Quarterly Growth
OntarioMD-Certified EMR	16,037	15,974	0.4%
HRM	9,722	9,530	2.0%
eNotifications	9,352	9,084	3.0%
OLIS	13,484	13,233	1.9%
eConsult Requesting Providers	17,466	16,874	3.5%
eConsult Specialists Registered	1,354	1,304	3.8%
ONE ID*	19,905	19,905	0.0%
i4C Dashboard	552	469	17.7%
Privacy & Security Training	820	769	6.6%
ConnectingOntario ClinicalViewer	1,085	822	32.0%

*ONE ID data is received on a quarterly basis from eHealth Ontario and, as a result, will not show growth month over month.
