

# EMR Core Data Set 6.1

## Version History

June 12, 2020

# 1. EMR SPECIFICATION CONTENTS

## 1.1 Documents

The EMR Core Data Set 6.1 Specification consists of the following documents:

ID	DOCUMENT NAME	PURPOSE
1	EMR Core Data Set Standard – Business View	Describes the business context and needs for certified EMR Offerings to have a common set of logical data elements
2	EMR Core Data Set Standard – Version History	Describes a history of changes made to this EMR Specification
3	EMR Core Data Set Standard – Requirements	Describes requirements for supporting the storage and/or display of logical data elements
4	EMR Core Data Set Standard – Data Dictionary	Defines the data element names, descriptions, associated code sets (where applicable), and conformance criteria for individual data elements
5	EMR Core Data Set Standard – Logical Data Model	Represents the data elements as key concepts (i.e. entities), their attributes, and their relationships in a single diagram. Provided purely as supplemental material
