

### Changes to EMR Specifications

The various documents that comprised EMR specification v4.2, published on April 1, 2015, served as the baseline for change. This log covers changes made to the documents that comprise the EMR Hosting 1.0 Specification, published on August 4, 2017.

#### EMR Hosting 1.0

Type of Change	Description
Major Changes	<ul style="list-style-type: none"> <li>• This is a new specification, however, the requirements for this specification were sourced from the 2014 ASP Expansion EMR-Certification Agreement.</li> <li>• The requirement to have a Threat and Risk Assessment (TRA) conducted on the hosted solution (HST08.01) was revised to state that the TRA must be conducted by an Information Security Professional with the appropriate credentials (e.g. CISSP: Certified Information Systems Security Professional).</li> </ul>
Minor Changes	<ul style="list-style-type: none"> <li>• Changed references to Weighted (W) requirements to Optional (O)</li> <li>• Updates throughout for use of common terms, capitalization, grammar and spelling</li> <li>• Updated OntarioMD document template, layout, fonts, colours, etc.</li> </ul>
