1. Introduction

The purpose of this report is to provide a monthly update on the provincial view of community-based family physicians' and community specialists' adoption and optimized use of certified EMRs and digital health tools and services integrated with certified EMRs. Except where indicated, this report does not include information about adoption of the referenced digital health applications by nurse practitioners or other health care service providers.

By helping physicians become increasingly proficient EMR users, OntarioMD assists physician practices in realizing more clinical value and the full potential of digital health tools and services to enhance patient care. These tools and services are also improving Ontarians' access to care and improving clinical outcomes in an increasingly integrated and coordinated health care system.

2. Executive Notes for October

New OntarioMD Board Members

OntarioMD is pleased to announce the appointment of two new members to our [Board of Directors](#): **Debbie Fischer**, Executive in Residence at the Rotman School of Business and **Huda Idrees**, founder and CEO of Dot Health, a real-time personal health data platform. Debbie and Huda bring impressive credentials in governance, organizational development, innovation, change management and health sector experience to provide guidance to OntarioMD and join our skilled Board of Directors that includes Dr. Gregory Athaide (Board Chair), Dr. Rachel Bevan, Dr. David Daien, Dr. Kevin Glasgow, Ken Smith and Allan O'Dette (OMA CEO and ex-officio member).

Physician Data Update

Ontario Physician Human Resources Data Centre (OPHRDC) published new data on practicing physicians in Ontario. OntarioMD has updated our tables with this new data. There are just over 800 new physicians (family physicians and specialists) and this update changes our physician denominator and may impact penetration numbers for services we provide and/or track.

Exploring Patient Access to Data

OntarioMD is working with health system partners to understand their data sharing needs and change the current state of sharing data. Building on its ability to deliver patient data to primary care providers' EMRs, HRM also has the capability to deliver patient summaries from EMRs to health care organizations and to deliver vital health data from other information systems to patients through existing patient portals. Patients can then access and manage their health data however they choose (e.g. through a portal or a mobile app).

Supporting Our Partners

OntarioMD supports clinicians with innovative digital health and quality improvement tools and approaches required to address their practice needs and to enhance the provision of integrated care in Ontario Health Teams as they take shape across the province. OntarioMD supports system partners

such as the Ministry of Health (MOH), the organizations that comprise Ontario Health and the Ontario Telemedicine Network (OTN), using a streamlined onboarding approach that bundles multiple digital health offerings in Ontario's digital health asset inventory into a single visit. This bundled approach is appreciated by clinicians for being more efficient and convenient.

ConnectingOntario ClinicalViewer – Starting with this month's report, a new ConnectingOntario ClinicalViewer table (Table 11) is now included. OntarioMD has now connected over 1,000 community-based, primary care clinicians provincially!

DHDR and DHIR - OntarioMD is working with the MOH and eHealth Ontario to connect up to 250 community-based physicians and nurse practitioners who use OntarioMD-certified EMRs in 2020 to the **Digital Health Drug Repository (DHDR)** and **Digital Health Immunization Repository (DHIR)** from their EMRs.

2018-19 Annual Report

OntarioMD published its Annual Report for the last fiscal year highlighting how we delivered on our objectives and targets – on time and on budget. We continue to find new ways to innovate, better ways to partner, more efficient ways to deploy and deliver solutions to clinicians that drive integrated care and system-wide quality improvement. Readers can visit the [interactive version](#) or download the [PDF file](#).

3. OntarioMD, Ontario Health and Ontario Health Teams

OntarioMD is focused on the delivery of digital health products and services that translate into clinical value for physicians and their patients. OntarioMD has the infrastructure, relationships and experience to deliver cost-effectively the full spectrum of high-quality digital health programs and services for clinicians and Ontario Health Teams across the province in alignment with Ontario's Digital First Strategy. It works closely, and in partnership, with health care organizations across Ontario.

OntarioMD staff take a holistic approach to working with physician practices, bundling products and change management services on behalf of our stakeholders for efficient visits to practices regionally and locally. This reduces multiple touchpoints to the physician office and streamlines training and onboarding, so physicians can spend less time on administration and more time on patient care.

What We Do

- Connect clinician practices to OntarioMD's digital health tools that improve access to care, clinical outcomes and decision-making, such as Health Report Manager (HRM), eNotifications and the i4C Dashboard.
- Connect clinician practices to eConsult on behalf of the Ontario eConsult Program, eVisits (Enhanced Access to Primary Care) on behalf of OTN, eNotifications in collaboration with HSSO, the DHDR and DHIR (when ready for deployment) on behalf of the Ministry, and deploy the

Ontario Laboratories Information System (OLIS), ConnectingOntario ClinicalViewer, ONE®ID and ONE Mail on behalf of eHealth Ontario.

- Provide physicians with trusted advice, guidance and onboarding support from OntarioMD staff, located across Ontario, to optimize EMR and digital health use
- Provide in-depth, hands-on support for physicians' quality improvement and population health management goals through our i4C Advisory Service's experienced staff
- Mentor physician practices with practical EMR tips from physician, nurse and clinic manager Peer Leaders who understand how physicians practice and share their expertise with the same EMR
- Advise public and private sector partners on how to develop and advance digital health tools and services for clinicians leveraging our OntarioMD Clinician Advisors for focus groups, and product feedback.
- Manage EMR vendors and deliver a trusted EMR certification program that assesses and monitors EMR offerings for compliance with the Ontario EMR Specifications. OntarioMD certification provides assurance to physicians that their EMRs are providing clinical value and are facilitating the exchange of EMR data. Vendors know that OntarioMD understands clinicians and how to bring digital health tools into their practices.

4. OntarioMD Products and Services

OntarioMD products and services are provincial digital health assets for clinicians and centred around patients. Enabling the flow of patient information directly to OntarioMD-certified EMRs:

- Supports access to care, services and health information
- Enhances the efficiency of the health system
- Strengthens quality, effectiveness and accountability
- Stimulates innovation and growth

OntarioMD receives funding from the Ministry of Health (MOH), with a mandate to support connectivity, interoperability, and integration of EMRs with the digital health delivery system more broadly and to work with clinicians to optimize the clinical value of their certified EMRs to provide enhanced care to their patients.

For an overview of all OntarioMD products and services, please read our [Products & Services brochure](#).

5. Quarterly Growth by Product/Service

Product/Category	Total Physicians (October 31, 2019)	Total Physicians (September 30, 2019)	Quarterly Growth
Certified EMR	16,002	15,974	0.2%
HRM	9,657	9,530	1.3%
eNotifications	9,308	9,084	2.5%
