

Take your EMR to new heights with the OntarioMD (OMD) Advisory Service

Through EMRs and integrated digital tools, clinicians can enhance patient care by leveraging quality data at their fingertips.

The OMD Advisory Service team is available to all users of OMD-certified EMRs to provide coaching to clinicians and practice staff, as well as practical support, to ensure clinicians are truly realizing the benefits of their EMR.

Our services are available to you and your staff whenever you need it, wherever you are in Ontario. We accommodate your schedule and can personalize our advice or offer group workshops to address your priorities and unique needs.

Our team of expert users have first-hand experience in practice workflows, digital health technology and change management.

Our coaches can help you use your EMR and other technology to:

- Generate reports and patient reminders for targeted, preventive patient care
- Enhance patient workflows
- Strengthen data quality to improve patient care
- Support meaningful use of digital health technology for improvement projects
- Consolidate patient data from other integrated digital tools for your convenience

“To have somebody who’s walked that road before you, and then allow them to lead you into that area, that was a big value-add for us.”

- Dr. Ken Gamble, Family Physician, Toronto
